Professional Summary

I'm a Technical Lead and Generative AI Engineer focused on building intelligent, high-scale systems that merge traditional full-stack engineering with next-generation AI capabilities. Over the past decade, I've led architecture modernization initiatives across e-commerce, analytics, and workflow automation driving multimillion-pound cost reductions, boosting performance, and introducing AI-augmented features like semantic search and agentic workflows. I'm particularly interested in AI-enhanced infrastructure, multi-cloud orchestration (AWS, Azure, GCP), and scalable developer ecosystems. My engineering philosophy is rooted in system design, observability, and enabling teams to ship fast with confidence.

Core Expertise

Leadership: Technical leadership, Architecture reviews, Engineering standards, Mentoring, Product thinking

AI & Architecture: Generative AI, LangGraph, Semantic search, Microservices, Event-driven systems

Full Stack: React, Vue, TypeScript, Node.js, Laravel, PostgreSQL

Cloud & Delivery: AWS, Docker, Kubernetes, CI/CD, Observability

Experience

Technical Lead

May 2026 – Present

Sino Lanka Group — Colombo, Western Province, Sri Lanka

- Driving architecture direction across full-stack systems, AI capabilities, and cloud delivery.
- Focusing on observability, developer ecosystems, and reliable engineering practices.
- Bringing senior technical leadership across AI-enhanced infrastructure and product delivery.

Technical Lead

Oct 2025 – May 2026

KAYA — Colombo

- Designed dynamic AI workflow engines with LangGraph and cloud-native delivery practices.
- Led distributed application work across multiple Kubernetes clusters.
- Shaped Node.js, TypeScript, Laravel, PostgreSQL, and platform engineering standards.

Technical Lead

Dec 2024 – Sep 2025

Brompton Bicycle — Greenford, England, United Kingdom

- Built an AI-powered full-text search engine, augmenting MySQL's native capabilities with semantic and vector-based search for product discovery and analytics.
- Integrated and orchestrated multi-stack systems, including MuleSoft for service orchestration and Oracle NetSuite for ERP synchronization and order lifecycle automation.
- Reduced checkout latency from 4.2s to 1.5s (60%+ improvement), boosting conversion rates by 12%.
- Shifted release cadence from monthly to biweekly and reduced technical debt by 30%, enforcing new internal architecture and CI/CD standards.

Senior Software Engineer

Jul 2023 – Dec 2024

NetWatch Global — Birmingham, England, United Kingdom

- Established and enforced industry standards for the engineering department and all company software, contributing to a more efficient and cohesive development process.
- Worked extensively with PHP, TypeScript, VueJS, AWS DynamoDB, and MySQL/PostgreSQL, leveraging these technologies to deliver robust and scalable solutions.

Senior Software Engineer

Jun 2021 – Nov 2022

MacroActive — Auckland, Auckland, New Zealand

- Designed, developed and deployed three major projects and was working on a fourth project before resignation.
- Responsibilities included but were not limited to training new recruits, performing code reviews, and planning weekly sprints.

Senior Software Engineer

Jan 2020 – Jul 2020

Elegant Media Australia — Colombo, Western Province, Sri Lanka

Senior Software Engineer delivering client and platform features at Elegant Media Australia.

Software Engineer <i>Elegant Media Australia</i> — Colombo, Western Province, Sri Lanka	Apr 2019 – Jan 2020
Software Engineer delivering client and platform features at Elegant Media Australia.	
Software Engineer <i>Seven's Idea (PVT) Ltd</i> — Colombo, Western Province, Sri Lanka	Jan 2018 – Mar 2019
Software Engineer building application features and client integrations at Seven's Idea.	
Software Engineer <i>Alta Vision Solar</i> — Colombo, Western Province, Sri Lanka	Jan 2017 – Jan 2018
Software Engineer delivering business systems and web applications at Alta Vision Solar.	
Early Career	2015–2017
Telecommunications Engineering Intern, Sri Lanka Telecom (2016); Telecommunications Engineering Intern, Sri Lanka Telecom (2015–2016); Associate Software Engineer, Alta Vision Solar (2015–2017).	

Selected Open-Source Work

Fetch PHP Modern PHP HTTP client inspired by JavaScript's fetch API. Async/await, streaming, SSE, middleware, RFC 7234 caching, and full PSR-7/18 compliance.	451 stars PHP
Filterable Enhance Laravel queries with adaptable, customisable filters and intelligent caching to improve both performance and functionality.	195 stars PHP
phpvm Simple PHP version manager for MacOS and Linux.	168 stars Shell
Comet A cross-platform desktop app powered by FFmpeg for easy, beautiful media conversion.	156 stars TypeScript
Matrix Bringing JavaScript-style async to PHP! Manage asynchronous tasks with ease using a modern, fiber-powered API for seamless concurrency and error handling.	59 stars PHP

Product Work

Honeymelon A premium Apple Silicon macOS app for fast, reliable media conversion, built as a focused commercial product.	Founder and builder
- Product-led work covering UX, packaging, performance, and release quality. - Connects engineering craft with market-facing product judgment.	

Education

Bachelor of Science - BS, Computer Science <i>University of Sunderland</i>	Sep 2022 – Jul 2023
Higher National Diploma <i>ICBT Campus</i>	Aug 2020 – Mar 2022

Certifications

AWS Certified Solutions Architect – Associate — Amazon Web Services AWS Certified Cloud Practitioner — Amazon Web Services
--

Languages

English (Native or bilingual proficiency) Tamil (Native or bilingual proficiency) Sinhala (Limited working proficiency)
