Professional Summary

Technical Lead and full-stack engineer with 11+ years across product engineering, enterprise integrations and cloud services. Hands-on with Node.js/TypeScript, React, Java/Spring Boot, Python and PHP/Laravel; GenAI work spans workflow engines, semantic/vector search and chatbot infrastructure. I lead platform modernisation, cloud reliability and open-source maintenance.

Core Expertise

GenAI and ML: LangGraph, LLM workflows, RAG, Embeddings, PyTorch
Data: Semantic/vector search, MySQL, PostgreSQL, Redis, MongoDB, DynamoDB
Backend: Node.js, TypeScript, Java, Spring Boot, Python, PHP, Laravel, REST APIs
Frontend: React.js, Next.js, Vue.js, Inertia.js, JavaScript, HTML, CSS
Cloud and delivery: AWS, GCP, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
Engineering: System design, Technical leadership, Observability, Code reviews, Playwright, Jest, pytest, PHPUnit

Experience

Technical Lead (Independent Contractor) May 2026 – Present
Sino Lanka Group

- Lead architecture and engineering work for EduSight as an independent contractor, spanning AI features, enterprise integrations and cloud reliability.
- Work on the Java 17/Spring Boot chatbot API gateway, addressing OkHttp connection pooling, MongoDB client reuse, retries and GCP Cloud Run/NAT connectivity.
- Contribute to WhatsApp Business integration and Embedded Signup configuration across QA and production environments.

Technical Lead Oct 2025 – May 2026
KAYA

- Designed LangGraph-based AI workflow engines using Node.js and TypeScript, working across Laravel and PostgreSQL application services.
- Led distributed application development across Kubernetes clusters for the KAYA platform and client-facing applications.

Technical Lead Dec 2024 – Sep 2025
Brompton Bicycle

- Led migration from Vue Storefront/Alokai to Laravel and Vue.js 3 on AWS, saving £130K per month (approximately £1.56M annually) and eliminating revenue-based fees.
- Reduced checkout latency from 4.2 seconds to 1.5 seconds, a 64% reduction.
- Built semantic/vector product search on MySQL and integrated MuleSoft with Oracle NetSuite for ERP synchronisation and order lifecycle automation.
- Introduced architecture and CI/CD standards, moving releases from monthly to every two weeks.

Senior Software Engineer Jul 2023 – Dec 2024
NetWatch Global

- Rebuilt a decade-old platform and delivered three major projects using PHP, TypeScript, Vue.js, AWS DynamoDB, MySQL and PostgreSQL.
- Established engineering standards across the department to improve consistency and maintainability.

Senior Software Engineer Jun 2021 – Nov 2022
MacroActive

- Designed, developed and deployed three major projects using React, Vue.js, TypeScript and PHP, with AWS DynamoDB and MongoDB.
- Trained new recruits, reviewed code and planned weekly sprints.

Earlier Experience
Elegant Media Australia | Software Engineer; Senior Software Engineer | Apr 2019 – Jul 2020; Seven's Idea | Software Engineer | Jan 2018 – Mar 2019; Alta Vision Solar | Associate Software Engineer; Software Engineer | Jun 2015 – Jan 2018.

Selected Open-Source Work

Honeymelon (formerly Comet) Creator and maintainer

TypeScript/Electron desktop media converter with a React interface currently in beta. Stable releases use the previous interface; conversions run locally with FFmpeg and bundled tools. The repository includes shared packages and Playwright end-to-end coverage.

Dokimos Creator and maintainer

Python CLI for plagiarism evidence discovery and heuristic AI-likeness analysis. It ingests text, Markdown, DOCX and PDF documents, validates inputs with Pydantic and produces structured reports. AI-likeness scores are heuristic signals, not proof of authorship.

Fetch PHP and Filterable and Matrix Open-source creator and maintainer

Maintain a Guzzle-based Fetch-inspired HTTP client and reusable Eloquent filtering for PHP/Laravel, plus Matrix async primitives for ReactPHP. These public libraries demonstrate API design, framework integration, event-driven programming and long-term open-source maintenance.

Education

BSc (Hons) Computer Systems Engineering — First Class Sep 2022 – Jul 2023

University of Sunderland

Higher Diploma in Computing and Software Engineering Aug 2020 – Mar 2022

ICBT Campus

Certifications

AWS Certified Solutions Architect - Associate — AWS | AWS Certified Cloud Practitioner — AWS
